

Pumps and Compressors: 2003

Issued February 2005

MA333P(03)-1

Current Industrial Reports

Current data are released electronically on Internet for all individual surveys as they become available. Use: <http://www.census.gov/mcd/>. Individual reports can be accessed by choosing "Current Industrial Reports (CIR)," clicking on "CIRs by Subsector;" then choose the survey of interest. Follow the menu to view the PDF file or to download the worksheet file (WK format) to your personal computer.

These data are also available on Internet through the U.S. Department of Commerce and STAT-USA by subscription. The Internet address is: www.stat-usa.gov/. Follow the prompts to register. Also, you may call 202-482-1986 or 1-800-STAT-USA, for further information.

SUMMARY OF FINDINGS

For 2003, the value of shipments for the types of pumps and compressors included in this report increased by 2 percent, from \$8,030.0 million to \$8,213.8 million. Value of shipments for pumps (except vacuum pumps), including parts, rose from \$4,862.7 million in 2002 to \$5,016.2 million in 2003, an increase of 3 percent. Vertical turbine

pumps (except drivers) decreased in value of shipments in 2003 by 5 percent, from \$253.7 million to \$241.1 million.

Domestic water systems, including drivers, increased 2 percent in value of shipments for 2003, from \$460.9 million to \$468.8 million. Domestic sump pumps, including drivers, increased in value of shipments by 40 percent in 2003, from \$140.3 million to \$195.9 million.

Oil well and oil field pumps increased in value of shipments for 2003, from \$279.0 million to \$282.0 million, an increase of 1 percent. The value of shipments of parts for pumps made by manufacturers of complete pumps increased 17 percent in 2003, from \$910.5 million to \$1,065.2 million.

Compressors, including vacuum pumps and parts, increased in value of shipments for 2003 by 1 percent, from \$2,715.2 million to \$2,754.7 million.

For general CIR information, explanation of general terms and historical note, see the appendix.

Address inquiries concerning these data to Investment Goods Industries Branch, Manufacturing and Construction Division (MCD), Washington, DC 20233-6900, or call Keeley Voor, 812-218-3341.

For mail or fax copies of this publication, please contact the Information Services Center, MCD, Washington, DC 20233-6900, or call 301-763-4673.

Table 1. Summary of Shipments of Pumps and Compressors: 2003 to 2002
[Quantity in number of units. Value in thousands of dollars]

Product description	2003		2002	
	Quantity	Value	Quantity	Value
Total.....	(X)	8,213,838	(X)	8,029,993
Pumps (except vacuum pumps), including parts.....	(X)	5,016,204	(X)	4,862,701
Industrial pumps.....	12,143,309	2,636,998	11,934,118	2,639,610
Drivers, reported.....	(X)	442,954	(X)	452,102
Centrifugal pumps (except drivers).....	8,078,737	1,594,257	7,650,333	1,553,051
Submersible, reported.....	816,235	285,243	829,504	258,738
Other, reported.....	6,838,765	1,266,518	6,418,166	1,252,472
Estimated from pre-1995-basis reports.....	423,737	42,496	402,663	41,841
Vertical turbine pumps (except drivers).....	51,074	241,141	66,523	253,691
Reported.....	50,729	237,841	66,074	250,219
Estimated from pre-1995-basis reports.....	345	3,300	449	3,472
Reciprocating pumps (except drivers), reported.....	693,926	206,176	671,242	175,062
Diaphragm pumps (except drivers), reported.....	1,737,239	220,809	1,821,313	222,784
Rotary pumps (except drivers), reported.....	869,449	290,948	907,297	301,711
Other (except drivers), reported.....	634,212	113,461	830,547	155,491
Estimated from other sources (potentially including drivers).....	78,672	22,914	77,317	22,937
Domestic water systems, including drivers.....	2,667,841	468,756	2,413,963	460,877
Reported.....	2,662,833	467,950	2,409,842	460,133
Estimated from other sources.....	5,008	806	4,121	744
Domestic sump pumps, including drivers.....	3,077,069	195,940	2,183,538	140,318
Reported.....	3,069,595	195,489	2,178,234	139,995
Estimated from other sources.....	7,474	451	5,304	323
Oil well and oil field pumps.....	43,204	282,005	38,048	279,040
Drivers, reported.....	(X)	(D)	(X)	(D)
Subsurface pumps for oil-well pumping.....	(D)	(D)	(D)	(D)
Mud pumps, slush pumps.....	(D)	(D)	(D)	(D)
Other oil well and oil field pumps.....	7,627	29,399	5,449	26,222
Estimated from other sources.....	714	5,018	629	4,965
Other pumps.....	6,226,030	367,295	6,457,876	432,320
Reported.....	6,205,232	366,272	6,436,304	431,116
Estimated from other sources.....	20,798	1,023	21,572	1,204
Parts (reported; made by manufacturers of complete pumps).....	(X)	1,065,210	(X)	910,536
Compressors, including vacuum pumps and parts.....	(X)	2,754,680	(X)	2,715,190
Air and gas compressors (but not vacuum pumps).....	(X)	2,296,363	(X)	2,261,957
Drivers (except for one category of gas compressor), reported.....	(X)	218,645	(X)	194,435
Air compressors (except drivers), new, stationary, reported.....	1,235,319	823,512	1,304,011	828,152
Air compressors (except drivers), new, portable, reported.....	2,310,753	543,279	2,325,136	479,382
Gas compressors (usually except drivers), new, stationary, reported.....	2,917	594,581	2,490	645,915
Other compressors (except drivers), reported.....	2,371	74,025	6,038	72,386
Estimated from other sources.....	60,585	42,321	62,058	41,687
Laboratory vacuum pumps (potentially including drivers; reported).....	(D)	(D)	(D)	(D)
Vacuum pumps (except laboratory).....	(X)	128,383	(X)	136,719
Drivers, reported.....	(X)	25,049	(X)	26,906
Except drivers, reported.....	187,894	93,186	192,775	99,006
Estimated from other sources (potentially including drivers).....	12,372	10,148	12,693	10,807
Parts (reported; made by manufacturers of complete compressors).....	(X)	(D)	(X)	(D)

D Withheld to avoid disclosing data for individual companies. X Not applicable.

D Withheld to avoid disclosing data for individual companies. n.e.c. Not elsewhere classified. n.s.k. Not specified by kind. pt. Part.
r/Revised by 5 percent or more from previously published data. X Not applicable.

1/Value includes parts but quantity does not.

2/Value of drivers (electric motors, internal combustion engines, hydrostatic transmissions, steam turbines, etc.) is not included for most product categories but rather placed in one of four separate "driver" categories within the product class. Drivers may be included in values for products in product classes without separate driver categories.

3/Not specified by kind or "n.s.k."; Values and quantities for a number of manufacturing establishments (either delinquent or too small to be included in the survey) were estimated from other surveys and records. Estimates were made only to the product class level. Drivers may be included in some cases.

4/Power pumps for water flooding are reported in product code 3339111363.

Note: Percent of estimation of each item is indicated as follows: a/16 to 25 percent of this item is estimated. b/26 to 50 percent of this item is estimated. c/Over 50 percent of this item is estimated.

D Withheld to avoid disclosing data for individual companies. NA Not available.

1/Manufacturers' shipments generally exclude values of drivers.

2/Source: Census Bureau report EM 545, U.S. Exports.

3/Excludes the value of drivers.

4/Sources: Census Bureau report IM 145, General Imports, and IM 146, U.S. Imports for Consumption.

5/Value represents the c.i.f. (cost, insurance, and freight) value at the first port of entry in the United States plus import duties.

6/Manufacturers' shipments detail does not necessarily sum to total because of such factors as drivers, parts, and "n.s.k."; see Table 2.

7/Manufacturers' shipments include n.s.k. (see Table 1) which is believed not to include submersible pumps.

8/Import and export data for three categories of compressors are combined because one harmonized code in the third category may be used interchangeably with any of several codes in the first two categories.

Note: For comparison of North American Industry Classification System (NAICS)-based codes with Schedule B export codes and HTSUSA import codes, see Table 4.

Table 4. Comparison of North American Industry Classification System (NAICS)-Based Product Codes with Schedule B Export Codes and HTSUSA Import Codes: 2003

General CIR Survey Information, Explanation of General Terms and Historical Note

GENERAL

The CIR program has been providing monthly, quarterly, and annual measures of industrial activity for many years. Since 1904, with its cotton and fats and oils surveys, the CIR program has formed an essential part of an integrated statistical system involving the quinquennial economic census, manufacturing sector, and the annual survey of manufactures. The CIR surveys, however, provide current statistics at a more detailed product level than either of the other two statistical programs.

The primary objective of the CIR program is to produce timely, accurate data on production and shipments of selected products. The data are used to satisfy economic policy needs and for market analysis, forecasting, and decision making in the private sector. The product-level data generated by these surveys are used extensively by individual firms, trade associations, and market analysts in planning or recommending marketing and legislative strategies, particularly if their industry is significantly affected by foreign trade. Although production and shipments information are the two most common data items collected, the CIR program collects other measures also such as inventories, orders, and consumption. These surveys measure manufacturing activity in important commodity areas such as textiles and apparel, chemicals, primary metals, computer and electronic components, industrial equipment, aerospace equipment, and consumer goods.

The CIR program uses a unified data collection, processing, and publication system. The U.S. Census Bureau updates the survey panels for most reports annually and reconciles the estimates to the results of the broader-based annual survey of manufactures and the economic census, manufacturing sector. The manufacturing sector provides a complete list of all producers of the products covered by the CIR program and serves as the primary source for CIR sampling. Where a small number of producers exist, CIR surveys cover all known producers of a product. However, when the number of producers is too large, cutoff and random sampling techniques are used. Surveys are continually reviewed and modified to provide the most up-to-date information on products produced. The CIR program includes a group of mandatory and voluntary surveys. Typically the monthly and quarterly surveys are conducted on a voluntary basis. Those companies that choose not to respond to the voluntary surveys are required to submit a mandatory annual counterpart corresponding to the more frequent survey.

NORTH AMERICAN INDUSTRY CLASSIFICATION SYSTEM (NAICS), 1997

The adoption of the North American Industry Classification System (NAICS) in the 1997 Economic Census has had a major impact on the comparability of current and historic data. Approximately half of the industries in the manufacturing sector of NAICS do not have comparable industries in the Standard Industrial Classification (SIC) system that was used in the past.

While most of the change affecting the manufacturing sector was change within the sector, some industries left manufacturing and others came into manufacturing. Prominent among those that left manufacturing are logging and portions of publishing. Prominent among the industries that came into the manufacturing sector are bakeries, candy stores where candy is made on the premises, custom tailors, makers of custom draperies, and tire retreading. The net effect of the classification changes are such that if the 1997 value of shipments data for all manufacturers were tabulated on an SIC basis, it would be approximately 3 percent higher.

Listed below are the NAICS sectors:

- 21 Mining
- 22 Utilities
- 23 Construction
- 31-33 Manufacturing
- 42 Wholesale Trade
- 44-45 Retail Trade
- 48-49 Transportation and Warehousing
- 51 Information
- 52 Finance and Insurance
- 53 Real Estate and Rental and Leasing
- 54 Professional, Scientific, and Technical Services
- 55 Management of Companies and Enterprises
- 56 Administrative and Support and Waste Management and Remediation Services
- 61 Educational Services
- 62 Health Care and Social Assistance
- 71 Arts, Entertainment, and Recreation
- 72 Accommodation and Food Services
- 81 Other Services (except Public Administration)

(Not listed above are the Agriculture, Forestry, Fishing, and Hunting sector (NAICS 11), partially covered by the census of agriculture conducted by the U.S. Department of Agriculture, and the Public Administration sector (NAICS 92), covered by the census of governments conducted by the Census Bureau.)

The 20 NAICS sectors are subdivided into 96 subsectors (three-digit codes), 313 industry groups (four-digit codes), and, as implemented in the United States, 1170 industries (five- and six-digit codes).

FUNDING

The Census Bureau funds most of the surveys. However, a number of surveys are paid for either fully or partially by other Federal Government agencies or private trade associations. A few surveys are mandated, but all are authorized by Title 13 of the United States Code.

RELIABILITY OF DATA

Survey error may result from several sources including the inability to obtain information about all cases in the survey, response errors, definitional difficulties, differences in the interpretation of questions, mistakes in recording or coding the reported data, and other errors of collection, response, coverage, and estimation. These nonsampling errors also occur in complete censuses. Although no direct measurement of the biases due to these nonsampling errors has been obtained, precautionary steps were taken in all phases of the collection, processing, and tabulation of the data in an effort to minimize their influence.

A major source of bias in the published estimates is the imputing of data for nonrespondents, for late reporters, and for data that fail logic edits. Missing figures are imputed based on period-to-period movements shown by reporting firms. A figure is considered to be an impute if the value was not directly reported on the questionnaire, directly derived from other reported items, directly available from supplemental sources, or obtained from the respondent during the analytical review phase. Imputation generally is limited to a maximum of 10 percent for any one data cell. Figures with imputation rates greater than 10 percent are suppressed or footnoted. The imputation rate is not an explicit indicator of the potential error in published figures due to nonresponse, because the actual yearly movements for nonrespondents may or may not closely agree with the imputed movements. The range of difference between the actual and imputed figures is assumed to be small. The degree of uncertainty regarding the accuracy of the published data increases as the percentage of imputation increases. Figures with imputation rates above 10 percent should be used with caution.

DATA REVISIONS

Statistics for previous years may be revised as the result of corrected figures from respondents, late reports for which imputations were originally made, or other corrections. Data that have been revised by more than 5 percent from previously published data are indicated by footnotes.

DISCLOSURE

The Census Bureau collects the CIR data under the authority of Title 13, United States Code, which specifies that the information can only be used for statistical purposes and cannot be published or released in any manner that would identify a person, household, or establishment. "D" indicates that data in the cell have been suppressed to avoid disclosure of information pertaining to individual companies.

EXPLANATION OF GENERAL TERMS

Capacity. The maximum quantity of a product that can be produced in a plant in 1 day if operating for 24 hours. Includes the capacity of idle plants until the plant is reported to be destroyed, dismantled, or abandoned.

Consumption. Materials used in producing or processing a product or otherwise removing the product from the inventory.

Exports. Includes all types of products shipped to foreign countries, or to agents or exporters for reshipment to foreign countries.

Gross shipments. The quantity or value of physical shipments from domestic establishments of all products sold, transferred to other establishments of the same company, or shipped on consignment, whether for domestic or export sale or use. Shipments of products purchased for resale are omitted. Shipments of products made under toll arrangements are included.

Interplant transfers. Shipments to other domestic plants within a company for further assembly, fabrication, or manufacture.

Inventories. The quantity or value of finished goods, work in progress, and materials on hand.

Machinery in place. The number of machines of a particular type in place as of a particular date whether the machinery was used for production, prototype, or sampling, or was idle. Machinery in place includes all machinery set up in operating positions.

Net receipts. Derived by subtracting the materials held at the end of the previous month from the sum of materials used during the current month.

Production. The total volume of products produced, including: products sold; products transferred or added to inventory after adjustments for breakage, shrinkage, and obsolescence, plus any other inventory adjustment; and products that undergo further manufacture at the same establishment.

Quantities produced and consumed. Quantities of each type of product produced by a company for internal consumption within that same company.

Quantity and value of new orders. The sales value of orders received during the current reporting period for products and services to be delivered immediately or at some future date. Also represents the net sales value of contract change documents that increase or decrease the sales value of the orders to which they are related, when the parties concerned are in substantial agreement as to the amount involved. Included as orders are only those that are supported by binding legal documents such as signed contracts or letter contracts.

Quantity and value of shipments. The figures on quantity and value of shipments represent physical shipments of all products sold, transferred to other establishments of the same company, or shipped on consignment, whether for domestic or export sale. The value represents the net sales price, f.o.b. plant, to the customer or branch to which the products are shipped, net of discounts, allowances, freight charges, and returns. Shipments to a company's own branches are assigned the same value as comparable appropriate

allocation of company overhead and profit. Products bought and resold without further manufacture are excluded.

Stocks. Total quantity of ending finished inventory.

Unfilled orders (backlog). Calculated by adding net new orders and subtracting net sales from the backlog at the end of the preceding year.

HISTORICAL NOTE

Data on pumps and compressors have been collected by the Census Bureau since 1960. Data on hydraulic fluid power pumps and motors formerly collected on this survey are now included in the Current Industrial Report, MA333N, Fluid Power Products. Historical data may be obtained from Current Industrial Reports available at your local Federal Depository Library.
